

THE LIFT SYSTEM is an innovative approach to carpet installation that can transform your work environment without expensive and time-consuming methods of dismantling and moving furniture. Using vertical installation technology, the Lift System is able to raise all of your office system furniture 1/4 inch off the ground and remove and replace your old carpet with new carpet tile. Without the cost of disassembly, or the cost of unhooking, removing, and replacing electrical wiring, by hiring movers, electricians and phone and computer cabling, the Lift System can give your office space a fresh start without sacrificing your work space or having to move employees.

EASY • AFFORDABLE • ATTRACTIVE • INNOVATIVE

The Lift System Process

1. Distribution of installation announcement cards to all employees.
2. Employees downloaded all material above 5 feet.
3. Loose wires are bundled and taped out of the way.
4. Installers cut around modular furniture to remove carpet.
5. Old carpet is carefully removed and disposed.
6. Modular furniture is lifted to free trapped carpet.
7. Floor patching and installation layout is determined. Floor preparation completed.
8. Adhesive is applied.
9. Carpet is installed using the Lift System to install under modular furniture.
10. Freestanding furniture is replaced.
11. Installed areas are vacuumed.

Virtually No Downtime

- Takes place on evenings, weekends, or vacation periods.
- Qualified trained professionals, assuring ultimate safety and security.
- Workstations are lifted in place, old carpets removed, and new carpet installed.
- Stations are returned to their original positions without disturbing electrical or communications connections.
- Virtually eliminates costly downtime in today's open office environment.

**20% TO 40%
CHEAPER**
THAN DISMANTLING
FURNITURE TO
REPLACE CARPET

**No Unhooking Computers
No Unwiring Phone Lines
No Hiring Movers
No Relocating Employees
No Hassle**
